Project Remedies Inc. and BMC Software
Demand Management and Running IT Like A Business.

Project Remedies Inc.

Leveraging your Investment in BMC's Remedy Action Request System

ActionProgram Manager Plus is part of Project Remedies Inc.'s IT Governance Suite. Like all Remedy-based applications, ActionProgram Manager Plus was developed with BMC Remedy's Action Request System. It is the only IT Project Portfolio Management System that integrates with an Asset Management System, and help:

- Reduce Costs.
- Improve Services Quality.
- Speed Time to Market.
- Integrate Staff into a Single Resource Pool.

"When we combined PRI's ActionProgram Manager Plus with our existing Remedy implementation, we got the resource information and the cost information we needed to run our business."
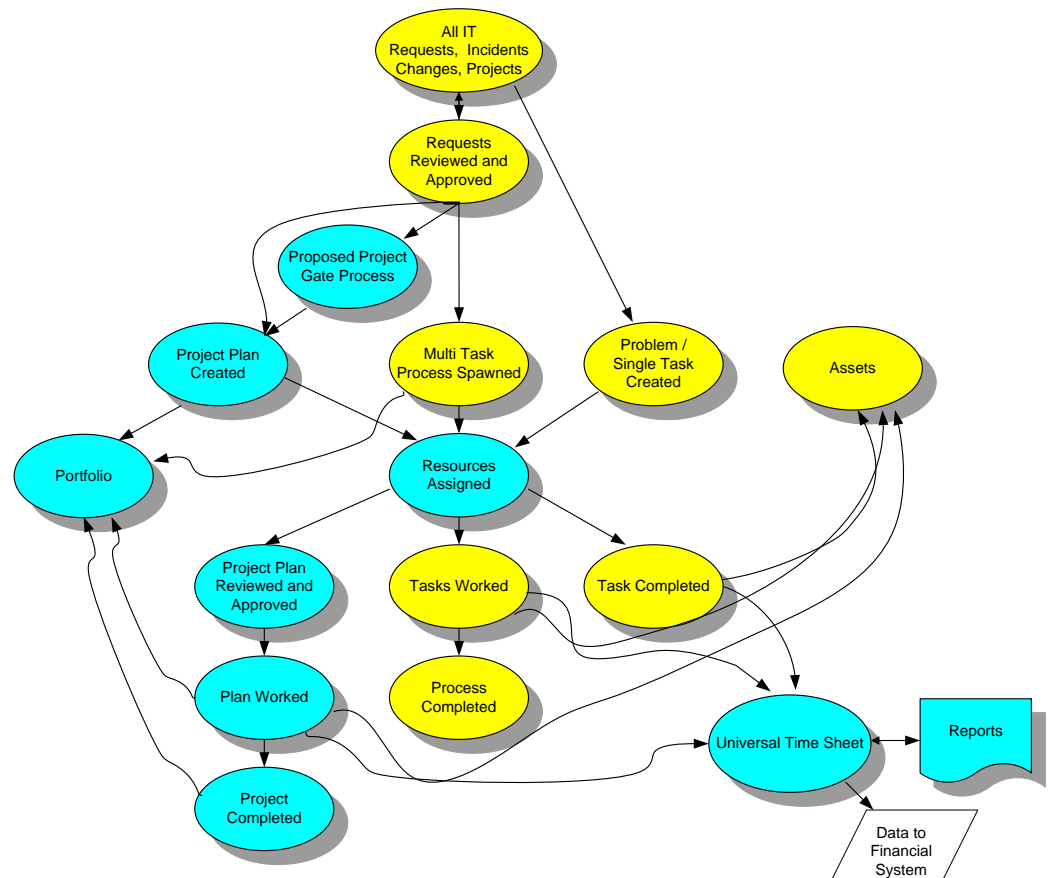

Licensing PRI's ActionProgram Manager Plus eliminated the need for the major integration project we were looking at with disparate products. Eliminating that cost was a major factor in our decision to implement an all Remedy-based solution. We call it "Nirvana."

Generating a Monthly Invoice for Each Business Unit and for Each Service.

As IT budgets decrease, being able to tell your customers exactly what IT is doing for them and the costs involved with providing these services is critical to managing your business.

BMC Software and Project Remedies Inc. have joined forces to resolve this issue, at the same time, eliminating the need for a major, costly and time-consuming major integration project if disparate products are chosen. Combining PRI's ActionProgram Manager Plus (in blue below) with your existing BMC Remedy ITSM Suite of applications (in yellow below) is the shortest, easiest, most complete, and least expensive way to have an integrated Demand Management System, to "Run IT Like a Business." It leverages your investment in BMC's Remedy Action Request System and the IT Service Management Suite. It is the only Demand Management System that links services with projects and projects with assets.

The Demand Management Framework.
